Reference project: applications of timber in civil engineering, residential and commercial construction, edition October 2014

Restauration Dudoktribune

Project:

Location	Hilversum, the Netherlands
Date of completion	2011
Wood species	Mandioqueira (mandio), uchy (uchi torrado), angelim/sapupira amarela (angelim pedra), cumaru
Certificate	FSC
Country / Region of Origin	Brazil
Application	Siding, outdoor steps, indoor steps, Beams and purlins, rafters and joists, columns, furring strips, banisters and rail parapets
Additional information	Mandioqueira (mandio) has been painted entirely and used as siding and for banisters and boardwalks of the stands. These stands have a cover overhead but are fully exposed to weather influences. angelim/sapupira amarela (angelim pedra) has been used for the seats and. Cumaru was used for the heavy beams and uchy for the other parts of the carrying construction below the stand floor.
